Key Difference – Yammer Slack vs Hipchat

Yammer, Slack, and Hipchat are collaboration platforms that allow team communication. Many companies are struggling to make a decision on which of the above is the best collaboration platform. The key difference between Yammer Slack and Hipchat is their collaboration platforms and how they work. The features provided by each platform are also different. Slack is mainly used by startups and other companies that are established. It is easy to use and able to integrate with other services. Hipchat also comes with many followers, with some new features that are on the way to compete with slack. You have to also consider yammer that has deep connections with [Office 365](#). There are other players but these three are the best at the moment.

Yammer – Features and Specifications

Microsoft can be easily said to be the hub of office productivity. Yammer ties with Microsoft Office 365 which is gaining popularity due to software as a service model that supports many platforms. Yammer is good to use if you require deep integration with office software and solutions.

The Yammer logo, featuring the word "yammer" in a blue, lowercase, sans-serif font. The letter "r" is stylized with three blue lines extending from its top right, resembling a speech bubble or sound waves. A small "TM" trademark symbol is located to the right of the "r".

Yammer also comes with an interface that is similar to social networks. It can turn out to be a comfortable transition for a wide collaboration with the enterprise.

Slack – Features and Specifications

The growth of Slack has been exponential. It was launched in 2013 and has over a million users. More than 30 percent of the customer base of Slack consists of paying customers. Each person is paying over 6 US dollars for the platform's

advanced features. The company is also expected to launch an enterprise edition in the near future. Slack is simple and is executed well. This makes Slack strong when compared to its competitors. It is also a giant chat room at the same time, which makes it even better. It also has the Slackbot commentary, the ability to integrate workflow, the ability to customize rooms, with many cloud services out there today.

Hipchat – Features and Specifications

Another big player on this playing field is hip chat. Hip chat also comes with lots of interesting features. While Slack tries to be cool and clever, Hipchat is focused on providing a focused environment to get the job done. Hipchat comes with specific improvements like how images and links perform and making necessary tweaks to keep up with the heavily hyped Slack. The company has ramped up many features to continue to battle with Slack. Hip chat is a formidable foe to Slack.
